

# ToC - Tale Of Capsuleer

Tail

July 2023

## 1 Introduction

Tale Of Capsuleer (ToC) is a simple program with the goal of making it easy for capsuleers in EVE Online to gain information about another character. The program do not modify EVE Online in anyway and purely reads the data the user has copied unto the clipboard and brings up the Zkillboard.com for the corresponding character. This allowing a faster flow of information to the user.

## 2 Installation

1. When you have downloaded the zipped folder you can extract it and place the folder containing the .exe in a location of your choice.
2. For easy access it is recommended to creat a shortcut to the .exe.
3. Launch the program.

## 3 How to use

1. After launching the program a small box with two buttons will appear.
2. First you can adjust the positioning and size of the program until you are satisfied. When happy with the positioning press the "save" button to save the startup position for next time.
3. To gather intel about another capsuleer you simply copy the name from the local chat and then press the button "Identify Capsuleer". After that the program will open up the Zkillboard of the capsuleer.

## 4 Contact

Incase you have any questions to the author of the program contact either through Github or ingame to Svanse.
